ANARCHY COOKBOOK VERSION 2000

Pictures and Reformatting for Word6 by Louis Helm

Table of Contents

1. Counterfeiting Money
2. Credit Card Fraud
3. Making Plastic Explosives
4. Picking Master Locks
5. The Arts of Lockpicking I
6. The Arts of Lockpicking II
7. Solidox Bombs
8. High Tech Revenge: The Beigebox
9. CO² Bombs
10. Thermite II Bombs
11. Touch Explosives
12. Letter Bombs
13. Paint Bombs
14. Ways to send a car to HELL
15. Do you hate school?
16. Phone related vandalism
17. Highway police radar jamming
18. Smoke Bombs
19. Mail Box Bombs
20. Hot-wiring cars
21. Napalm
22. Fertilizer Bomb
23. Tennis Ball Bomb
24. Diskette Bombs
25. Unlisted Phone Numbers
26. Fuses
27. How to make Potassium Nitrate
28. Exploding Lightbulbs
29. Under water igniters
30. Home-brew blast cannon
31. Chemical Equivalency List
32. Phone Taps
33. Landmines
34. A different Molotov Cocktail
35. Phone Systems Tutorial I
36. Phone Systems Tutorial II
37. Basic Alliance Teleconferencing
38. Aqua Box Plans
39. Hindenberg Bomb
40. How to Kill Someone
41. Phone Systems Tutorial III
42. Black Box Plans
43. The Blotto Box
44. Blowgun
45. Brown Box Plans
46. Calcium Carbide Bomb
47. More Ways to Send a Car to Hell
48. Ripping off Change Machines
49. Clear Box Plans
50. CNA Number Listing
51. Electronic Terrorism

52. Start a Conf. w/o 2600hz or MF
53. Dynamite
54. Auto Exhaust Flame Thrower
55. How to Break into BBs Express
56. Firebomb
57. Fuse Bomb
58. Generic Bomb
59. Green Box Plans
60. Portable Grenade Launcher
61. Basic Hacking Tutorial I
62. Basic Hacking Tutorial II
63. Hacking DEC's
64. Harmless Bombs
65. Breaking into Houses
66. Hypnotism
67. Remote Informer Issue #1
68. Jackpotting ATM Machines
69. Jug Bomb
70. Fun at K-Mart
71. Mace Substitute
72. How to Grow Marijuana
73. Match Head Bomb
74. Terrorizing McDonalds
75. "Mentor's" Last Words
76. The Myth of the 2600hz Detector
77. Blue Box Plans
78. Napalm II
79. Nitroglycerin Recipe
80. Operation: Fuckup
81. Stealing Calls from Payphones
82. Pool Fun
83. Free Postage
84. Unstable Explosives
85. Weird Drugs
86. The Art of Carding
87. Recognizing Credit Cards
88. How to Get a New Identity
89. Remote Informer Issue #2
90. Remote Informer Issue #3
91. Remote Informer Issue #4
92. Remote Informer Issue #5
93. Phreaker's Guide to Loop Lines
94. Ma-Bell Tutorial
95. Getting Money out of Pay Phones
96. Computer-based PBX
97. PC-Pursuit Port Statistics
98. Pearl Box Plans
99. The Phreak File
100. Red Box Plans
101. RemObs
102. Scarlet Box Plans
103. Silver Box Plans
104. Bell Trashing

1. Counterfeiting Money

by The Jolly Roger

Before reading this article, it would be a very good idea to get a book on photo offset printing, for this is the method used in counterfeiting US currency. If you are familiar with this method of printing, counterfeiting should be a simple task for you.

- CAUTION: Nitric acid should be kept away from all combustibles and should be kept in a SEALED CERAMIC OR GLASS container. DO NOT inhale fumes!

134. Dust Bomb Instructions

by The Jolly Roger

An initiator which will initiate common material to produce dust explosions can be rapidly and easily constructed. This type of charge is ideal for the destruction of enclosed areas such as rooms or buildings.

Material Required:

- A flat can, 3 in. (8 cm) in diameter and 1-½ in. (3-¾ cm) high. A 6-ounce tuna can serves the purpose quite well.
- Blasting cap
- Explosive
- Aluminum (may be wire, cut sheet, flattened can, or powder)
- Large nail, 4 in. (10 cm) long
- Wooden rod - ¼ in. (6 mm) diameter
- Flour, gasoline, and powder or chipped aluminum

NOTE: Plastic explosive produce better explosions than cast explosives.

Procedure:

1. Using the nail, press a hole through the side of the tuna can 3/8 inch to ½ inch (1 to 1-½ cm) from the bottom. Using a rotating and lever action, enlarge the hole until it will accommodate the blasting cap.
2. Place the wooden rod in the hole and position the end of the rod at the center of the can.
3. Press explosive into the can, being sure to surround the rod, until it is ¾ inch (2 cm) from the top of the can. Carefully remove the wooden rod.
4. Place the aluminum metal on top of the explosive.
5. Just before use, insert the blasting cap into the cavity made by the rod. The initiator is now ready to use.

NOTE: If it is desired to carry the initiator some distance, cardboard may be pressed on top of the aluminum to insure against loss of material.

How to Use:

This particular unit works quite well to initiate charges of five pounds of flour, ½ gallon (1-2/3 liters) of gasoline, or two pounds of flake painters aluminum. The solid materials may merely be contained in sacks or cardboard cartons. The gasoline may be placed in plastic coated paper milk cartons, as well as plastic or glass bottles. The charges are placed directly on top of the initiator and the blasting cap is actuated electrically or by a fuse depending on the type of cap employed. this will destroy a 2,000 cubic feet enclosure (building 10 x 20 x 10 feet).

Note: For larger enclosures, use proportionally larger initiators and charges.

135. Carbon-Tet Explosive

by The Jolly Roger

A moist explosive mixture can be made from fine aluminum powder combined with carbon tetrachloride or tetrachloroethylene. This explosive can be detonated with a blasting cap.

Material Required:

- Fine aluminum bronzing powder
- Carbon Tetrachloride or Tetrachloroethylene
- Stirring rod (wood)
- Mixing container (bowl, bucket, etc.)
- Measuring container (cup, tablespoon, etc.)

- Storage container (jar, can, etc.)
- Blasting cap
- Pipe, can or jar

Source of Carbon Tetrachloride:

- Paint store
- Pharmacy
- Fire extinguisher fluid

Source of Tetrachloroethylene:

- Dry cleaners
- Pharmacy

Procedure:

1. Measure out two parts aluminum powder to one part carbon tetrachloride or tetrachlorethylene liquid into mixing container, adding liquid to powder while stirring with the wooden rod.
2. Stir until the mixture becomes the consistency of honey syrup.

- CAUTION: Fumes from the liquid are dangerous and should not be inhaled.

3. Store explosive in a jar or similar water proof container until ready to use. The liquid in the mixture evaporates quickly when not confined.

NOTE: Mixture will detonate in this manner for a period of 72 hours.

How to Use:

1. Pour this mixture into an iron or steel pipe which has an end cap threaded on one end. If a pipe is not available, you may use a dry tin can or glass jar.
2. Insert blasting cap just beneath the surface of the explosive mix.

NOTE: Confining the open end of the container will add to the effectiveness of the explosive.

136. Making Picric Acid from Aspirin

by The Jolly Roger

Picric Acid can be used as a booster explosive in detonators, a high explosive charge, or as an intermediate to preparing lead picric.

Material Required:

- Aspirin tablets (5 grains per tablet)
- Alcohol, 95% pure
- Sulfuric acid, concentrated, (if battery acid, boil until white fumes disappear)
- Potassium Nitrate (see elsewhere in this Cookbook)
- Water
- Paper towels
- Canning jar, 1 pint
- Rod (glass or wood)
- Glass containers
- Ceramic or glass dish
- Cup
- Teaspoon
- Tablespoon
- Pan
- Heat source
- Tape

Procedure:
